Based in Islamabad, Pakistan

I design packaging, labels and brand identities that stand out on the shelf and reach the printer as clean, ready-to-run files. Over six years of independent practice I have worked with hundreds of clients. A background in physics brings precision to every project: measured dielines, careful colour, and graphics that make complex ideas easy to read.

Experience

Freelance designer and brand consultant 2020 to present

Independent practice, remote clients, including through Upwork

- Packaging and label design for product brands, from brief and dieline through to print-ready artwork.
- Brand identities covering logo, colour, typography, stationery and guidelines.
- Social media design and marketing, including bilingual Arabic and English campaign work.
- Website design and redesigns for businesses and independent professionals.
